Somos especialistas en  
moquetas de alta calidad.

Disponemos de una amplia variedad de colecciones con alturas, densidades, calidades y tonalidades que dan respuesta a las exigentes demandas de los proyectos de interiorismo.

We're specialists in high  
quality carpets.

We provide a wide variety of collections with heights, densities, qualities and shades that meet the demanding requirements of interior design projects.

## Alfombras al corte

A la vez, convertimos las moquetas en alfombras a medida para los principales prescriptores de la alta decoración en España.

## Cut-to-size rugs

At the same time, we turn carpets into custom-made rugs for the leading specifiers of high decoration in Spain.

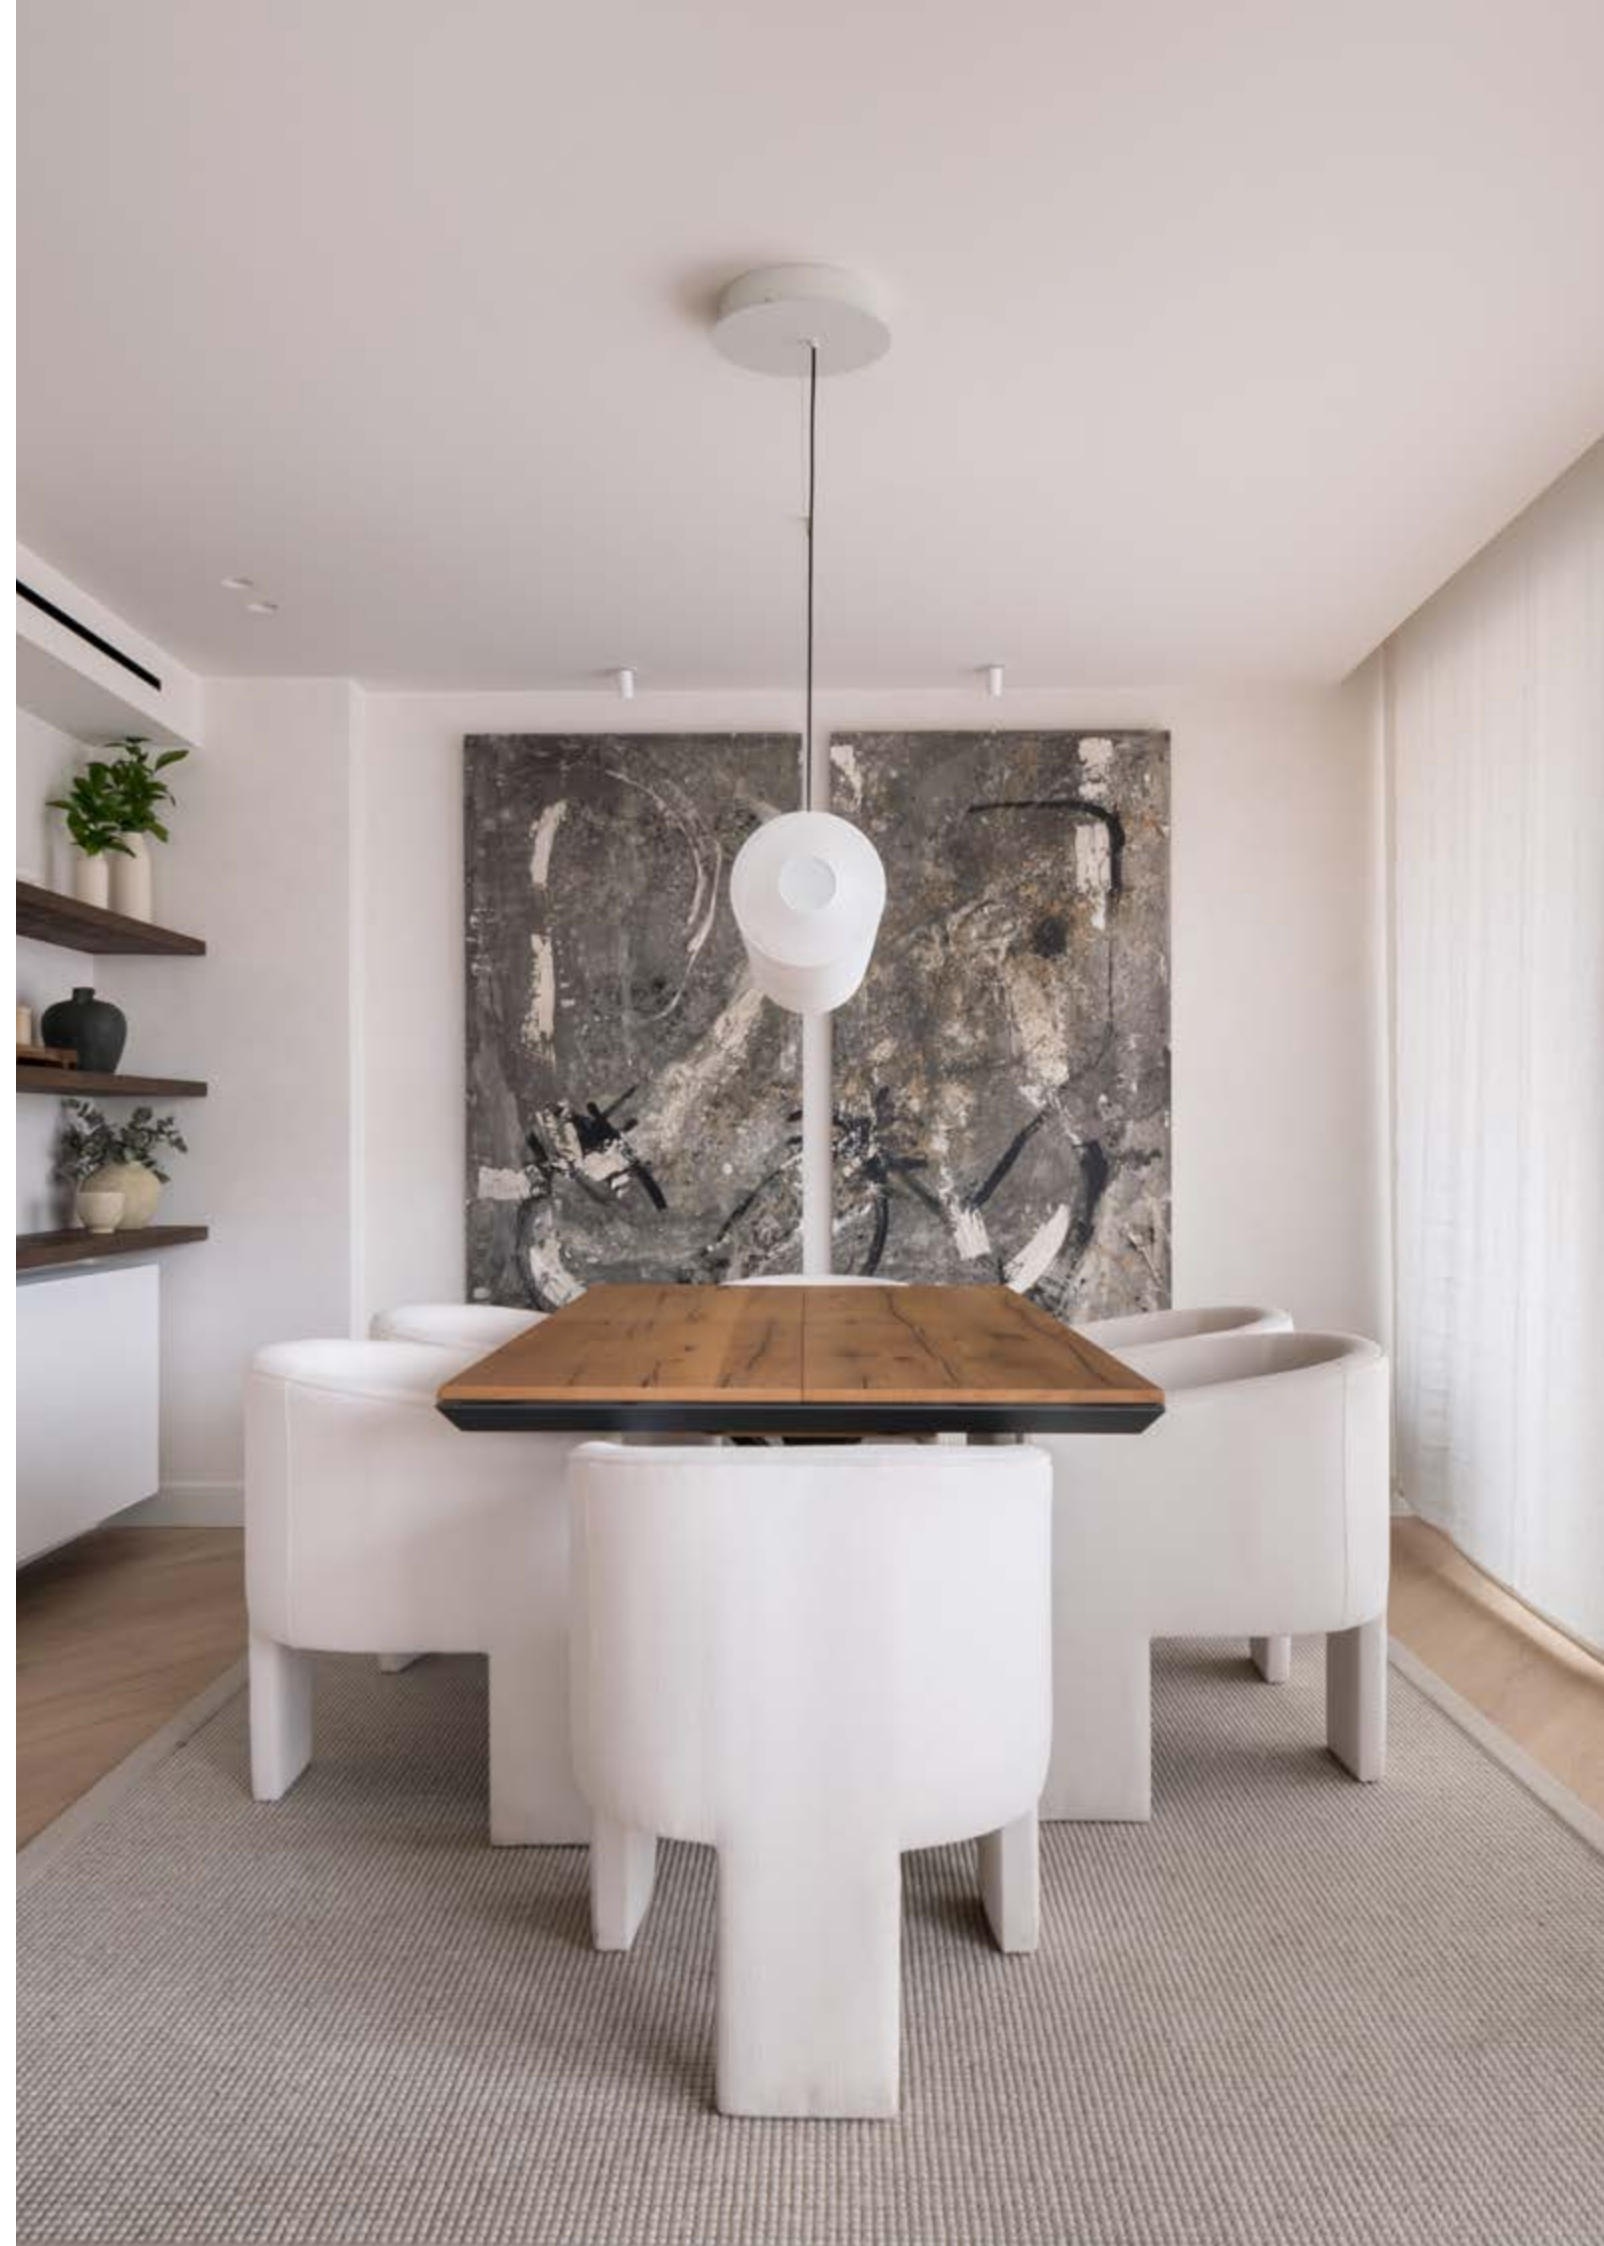

## El toque maestro

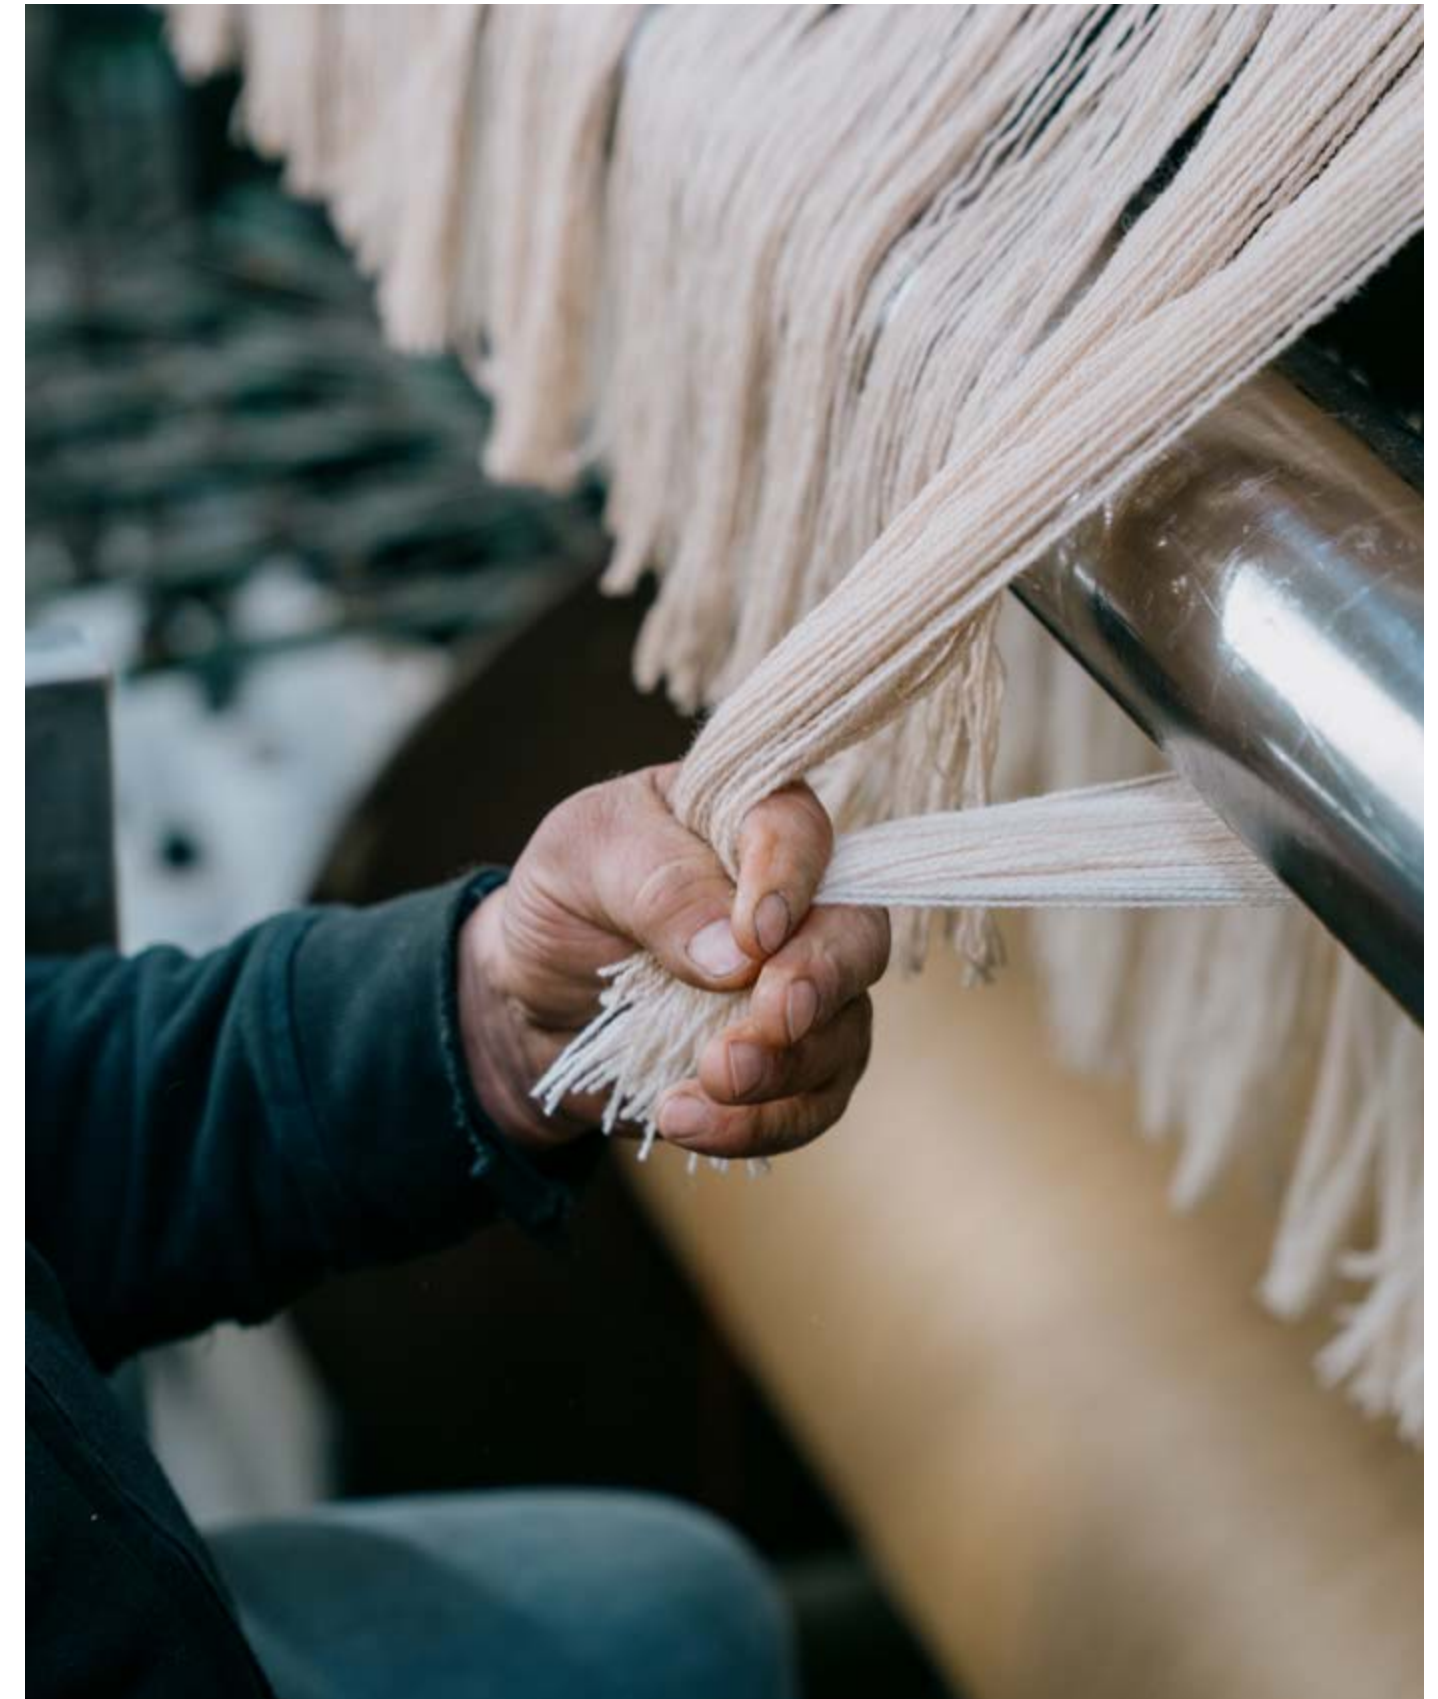

Los detalles marcan la diferencia. Contamos con gran variedad de acabados de calidad como: ribete, cenefa, bordón o cinta. Complementando el producto a medida, tanto a nivel estético como funcional .

## Master touch

Details make the difference. We offer a wide variety of quality finishes such as: edging, border, beading or ribbon. Complementing both aesthetically and functionally the customized product.

## El poder de la fibra

La calidez de la lana, el aspecto rústico del sisal, la sutileza del lino o la resistencia de la poliamida son solo algunas de las cualidades de las fibras empleadas.

## Fiber power

The warmth of wool, the rustic look of sisal, the subtlety of linen or the endurance of polyamide are just some of the qualities of the fibers used.

# Certificados

**Fig. 1**  
Estos hacen referencia al uso doméstico de tu alfombra o moqueta:  
Uso ligero u ocasional (21)  
Uso medio (22)  
Uso medio/intensivo (22+)  
Uso intensivo (23)

**Fig. 2**  
Estos miden la resistencia de tu alfombra o moqueta a un uso comercial:  
Uso ligero u ocasional (31)  
Uso con tráfico medio (32)  
Uso con tráfico intenso (33)

**Fig. 3**  
Las alfombras o moquetas pueden variar en lujo/confort que es expresado con estos símbolos, siendo la calificación más alta la de 5 estrellas.

**Fig. 4**  
La reacción al fuego está estrictamente regulada por la UE.

En general, EFL es suficiente para un uso residencial y CFL BFL para un uso comercial o profesional.

**Fig. 5**  
De acuerdo con la norma EN 14041 los revestimientos de suelo deben de cumplir con ciertos requisitos de seguridad y uno de ellos es la resistencia al deslizamiento.  
Cuando el coeficiente de fricción es 0.30 se utiliza el DS y en los demás casos NPO.

**Fig. 6**  
Cuando tu alfombra o moqueta es sometida a la presión de sillas con ruedas este estrés es máximo. Solo las que cumplan con los requisitos exigidos por un procedimiento de ensayo específico podrán utilizar dichos símbolos:  
El primero indicaría que el uso de sillas con ruedas de una forma ocasional no dañaría su alfombra.  
El segundo indicaría que la alfombra o moqueta esta preparada para un uso continuo de sillas con ruedas como puede ser el caso de una oficina. Etc

**Fig. 7**  
Si la alfombra o moqueta se utiliza en escaleras esta va a ser sometida a una tensión extrema. En base a unas pruebas específicas podemos distinguir entre:  
Las que pueden ser utilizadas en escaleras de una forma ocasional  
Las que se pueden utilizar en escaleras de una forma continua.

**Fig. 8**  
El símbolo indica que la alfombra o moqueta tiene tal resistencia térmica que se puede utilizar en combinación con los sistemas de calefacción por suelo radiante.

**Fig. 9**  
Indica que la alfombra tiene propiedades anti estáticas

**Fig. 10**  
Indica resistencia al deshilachado, lo que quiere decir que los bordes de corte y las costuras no se deshilachan.

**Fig. 11**  
Indica que de acuerdo con la norma EN ISO 354 el coeficiente de absorción acústica es el adecuado.

**Fig. 12**  
Este símbolo se utiliza si según la norma EN ISO 140-6 la alfombra o moqueta mejora el ruido de impacto acústico. Hay que tener en cuenta que todos los revestimientos textiles muestran una mejora de impacto acústico excelente.

**Fig. 13**  
Indica que la alfombra o moqueta cumple con los requisitos básicos para resistir a la decoloración producida por la luz solar de acuerdo con las pruebas exigidas por la norma EN ISO 105-B02.

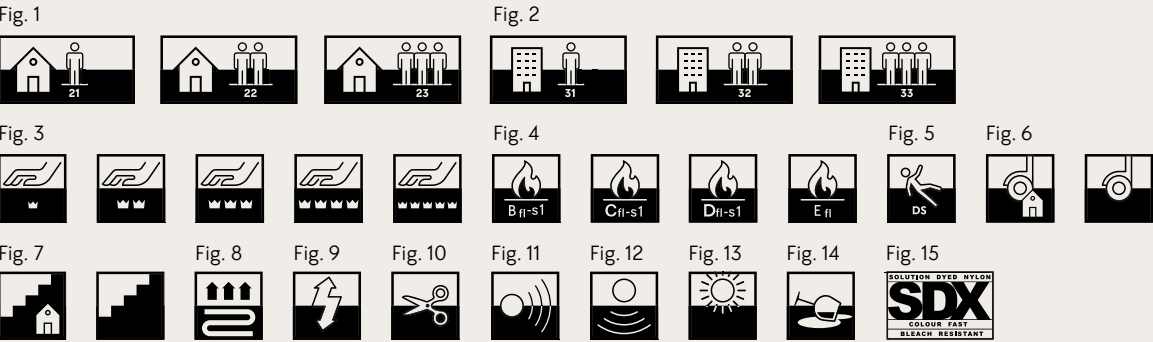

**Fig. 14**  
Repelente a líquidos y manchas.

**Fig. 15**  
SOLUTION DYED, bleach cleanable. Fibra tenida en masa, se puede limpiar con lejía.

# Certificates

**Fig. 1**  
These refer to the domestic use of your carpet or rug:  
Light or occasional use (21)  
Medium use (22)  
Medium/intensive use (22+)  
Intensive use (23)

**Fig. 2**  
These measure the resistance of your carpet to commercial use:  
Light or occasional use (31)  
Medium traffic use (32)  
Heavy traffic use (33)

**Fig. 3**  
Carpets or rugs may vary in luxury/comfort which is expressed with these symbols, the highest rating being 5 stars.

**Fig. 4**  
Reaction to fire is strictly regulated by the EU.

Generally, EFL is sufficient for residential use and CFL BFL for commercial or professional use.

**Fig. 5**  
According to EN 14041, floor coverings must meet certain safety requirements, one of which is slip resistance.  
When the coefficient of friction is 0.30 DS is used and in other cases NPO.

**Fig. 6**  
When your carpet or rug is subjected to pressure from wheelchairs, this stress is at its highest. Only those that meet the requirements of a specific test procedure may use these symbols:  
The first would indicate that the use of chairs with casters on an occasional basis would not damage your carpet.  
The second would indicate that the carpet or carpeting is prepared for continuous use of chairs with casters such as in an office etc...

**Fig. 7**  
If carpet is used on stairs, it will be subjected to extreme stress. According to specific tests we can distinguish between:  
Those that can be used on stairs on an occasional basis.  
Those that can be used on stairs on a continuous basis.

**Fig. 8**  
The symbol indicates that the carpet or rug has such thermal resistance that it can be used in combination with underfloor heating systems.

**Fig. 9**  
Indicates that the carpet has anti-static properties.

**Fig. 10**  
Indicates resistance to fraying, which means that the cut edges and seams do not fray.

**Fig. 11**  
Indicates that according to EN ISO 354 the sound absorption coefficient is adequate.

**Fig. 12**  
This symbol is used if according to EN ISO 140-6 the carpet or rug improves the acoustic impact noise. It should be noted that all textile coverings show excellent acoustic impact improvement.

**Fig. 13**  
Indicates that the carpet or rug meets the basic requirements for resistance to discoloration caused by sunlight according to the tests required by EN ISO 105-B02.

**Fig. 14**  
Liquid and stain repellent.

**Fig. 15**  
SOLUTION DYED, bleach cleanable. Dyed fiber in mass, can be cleaned with bleach.

# Colocación

Una alfombra correctamente integrada en un espacio puede realzar el diseño y aportar confort. Para ello, es conveniente tener en cuenta una serie de factores, siendo primordial que las características de la alfombra (color, grosor, estampado, bordes, etc.) se adapten a la perfección al ambiente en el que se va a colocar.

En Cotlin asesoramos y ofreceremos el apoyo profesional que necesitas para seleccionar la alfombra que más te conviene en función de su uso, así como del estilo y las características específicas del proyecto de interiorismo.

A nivel de colocación de la alfombra tendremos en cuenta los siguientes conceptos:

## Salón

### Opciones A+B+C+D

Se recomienda alinear la alfombra con respecto a la posición de los muebles, teniendo en cuenta la forma de la habitación y otros elementos fijos. Con alfombras de grandes dimensiones, es conveniente que el sofá se coloque sobre ella, pisando entre 15 y 20 cm para evitar que se desplace.

### Opciones E+F

Coloca la alfombra a una distancia mínima de 15 cm con respecto a todos los muros perimetrales o a cualquier otro elemento fijo del espacio. Las medidas de la alfombra deberán permitir que las puertas puedan abrirse correctamente.

## Dormitorio

### Opción A

Es recomendable que la alfombra tenga la misma anchura que la cama o que sea ligeramente superior. También se debe facilitar que la alfombra tenga una profundidad mínima, de entre 50 y 80 cm, en función del espacio disponible a los pies de la cama. Por último, a la hora de seleccionar los acabados de los bordes, se ha de tener en cuenta que para alfombras pequeñas, los marcos estrechos son más favorecedores.

### Opción C

Esta opción es adecuada para grandes dormitorios. Recomendamos que la alfombra se extienda hasta sobrepasar el límite de cualquier mueble que acompañe la cama, y que sea proporcional en todos los lados. En alfombras y moquetas de gran tamaño, proponemos acabar el perímetro con acabados más anchos, para un resultado equilibrado.

### Opción B

La anchura de los muebles que acompañan lateralmente la cama, debe ser la que delimite el tamaño de la alfombra; de esta manera, se podrá alinear la pieza teniendo en cuenta la longitud de la cama. Aún así, es recomendable un ancho mínimo de 50 cm dependiendo del espacio disponible alrededor de la cama. Al igual que en el caso anterior, recomendamos terminar la alfombra con unos acabados adecuados.

### Opción D

Solución apta para habitaciones medianas o grandes. Es importante colocar la alfombra centrada con respecto a la cama y que en cada uno de los lados sobresalga por igual, sería recomendable dejar un margen de 50 cm de ancho alrededor de la base y los laterales de la cama. La alfombra debe superar en anchura a las mesillas de noche situadas a ambos lados de la cama.

## Comedor

Es recomendable dejar un mínimo de 75 cm alrededor de la mesa; de esta forma permitiremos que las sillas siempre estén colocadas sobre la alfombra cuando haya personas sentadas alrededor.

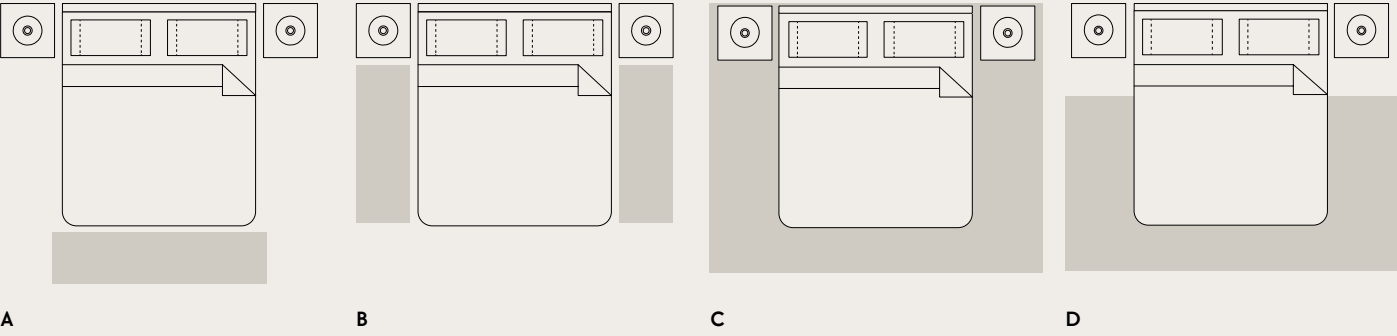

## Pasillera

Coloca la alfombra dejando una distancia mínima de 10 cm con respecto a todas las paredes o muebles. Recuerda también comprobar la holgura de la puerta.

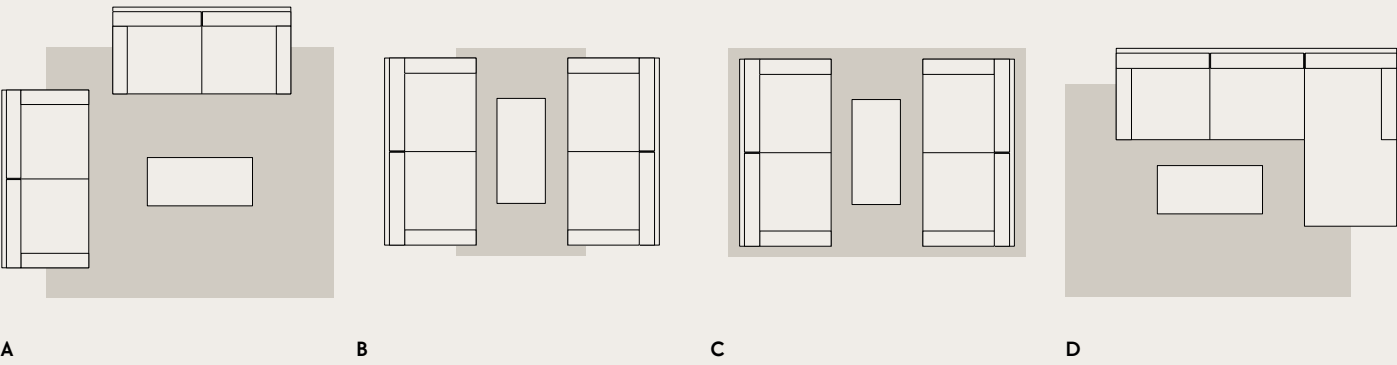

## Pasillo

Es posible que una moqueta a medida sea la que mejor se adapte a la forma de tu pasillo. En ese caso ten en cuenta elementos concretos, como las esquinas. En este caso recomendamos una moqueta que tenga unos acabados con bordes a medida.

# Placement

A rug that is correctly integrated into a space can enhance the design and provide comfort. To achieve this, a number of considerations should be taken into account, and it is essential that the characteristics of the rug (colour, thickness, pattern, borders, etc.) are perfectly suited to the room in which it is to be placed.

Cotlin will advise and offer the professional support you need to select the right rug according to its use, as well as the style and specific requirements of your interior design project.

The following concepts should be taken into account when laying the rug:

## Living room

### Options A+B+C+D

It is recommended to align the rug in relation to the position of the furniture, taking into account the shape of the room and other fixed elements. With large rugs, it is convenient placing the sofa on top of the rug, stepping on it between 15 and 20 cm to prevent it from shifting.

### Options E+F

Place the rug at least 15 cm away from all perimeter walls or any other fixed element in the space. The dimensions of the rug should allow the doors to open properly.

## Bedroom

### Option A

It is recommended that the rug is the same width as the bed or slightly wider. It should also be ensured that the rug has a minimum depth of between 50 and 80 cm, depending on the space available at the foot of the bed. Finally, when selecting border finishes, narrow frames are more appropriate for small rugs.

### Option B

The width of the furniture that accompanies the side of the bed should be the width that delimits the size of the rug, so that the piece can be aligned taking into account the length of the bed. In addition, a minimum width of 50 cm is recommended, depending on the space available around the bed. As in the previous case, we recommend finishing the carpet with a suitable finish.

### Option C

A suitable option for large bedrooms. We recommend that the rug should extend beyond any furniture that accompanies the bed, and be proportional on all sides. For rugs and carpets, we suggest ending the perimeter with wider finishes, for a balanced result.

### Option D

This solution is ideal for medium to large rooms. It is important to place the rug centrally in relation to the bed and that it protrudes equally on each side, it would be advisable to leave a margin of 50 cm wide around the base and sides of the bed. The rug should be wider than the bedside tables on either side of the bed.

## Dining room

It is recommended to leave a minimum of 75 cm around the table; this will allow the chairs to always be placed on the rug when people are seated around it.

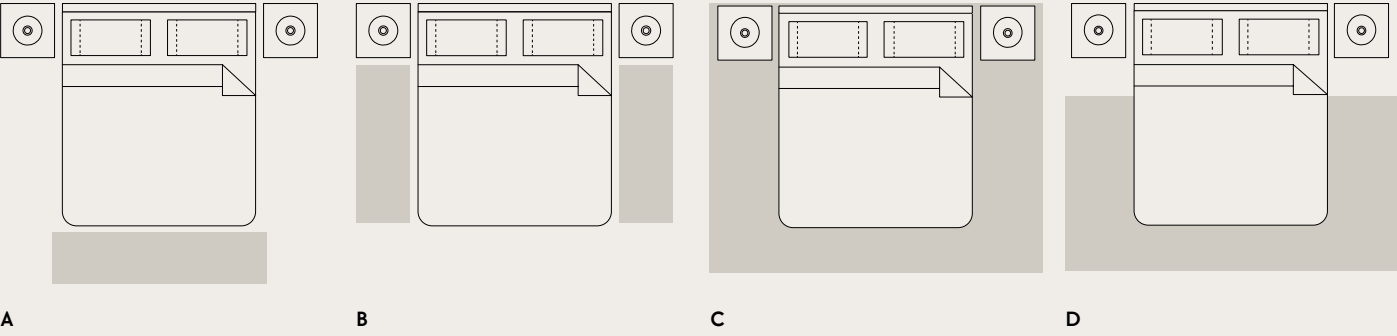

## Runner

Lay the rug with a minimum distance of 10 cm from all walls or furniture. Also remember to check that the door opens properly.

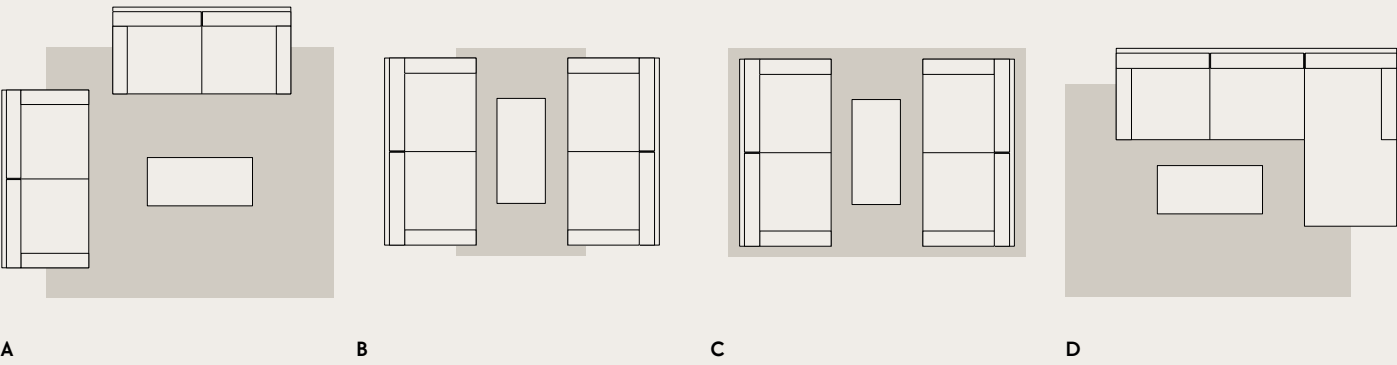

## Hallway

It is possible that a made-to-measure carpet is best suited to the shape of your hallway. In this case, take specific elements into account, such as corners. In this case we recommend a carpet that is finished with tailored edges.

# Mantenimiento

## Prolonga la vida de tu alfombra

Con un mantenimiento correcto y continuado, tu alfombra puede preservarse en un estado óptimo y presentar una apariencia impecable durante muchos años. Por lo general, las alfombras que requieren mayores cuidados son las de colores claros o monocromáticas, así como aquellas que tienen menor densidad, que son más finas; por el contrario, las de mayor consistencia o que presentan tonalidades oscuras y/o estampadas son más fáciles de mantener. En cualquier caso, conviene evitar sacudirlas y azuzarlas a la hora de limpiarlas, así como los tratamientos agresivos que pueden dañar sus fibras. Desde Cotlin recomendamos una limpieza mediante aspiración (utilizando la función específica para alfombras) y seguir las siguientes indicaciones.

## Mantenimiento general y medidas preventivas

### Protectores de alfombras

Si colocas muebles pesados sobre la alfombra, recomendamos colocar protectores de alfombra en las patas de dichos muebles, para distribuir la presión del peso de los mismos, sobre la alfombra.

### Gire la alfombra con regularidad

Con el fin de que los pesos no recaigan siempre en los mismos puntos de la alfombra.

## Instrucciones de uso específicas

### Recepción de la alfombra nueva

A la recepción de la alfombra nueva, retírala de forma inmediata de la envoltura, para evitar acumulación de humedad.

### Utilización de underline

Se recomienda si no va a haber objetos pesados sobre la alfombra, para evitar desplazamientos.

### Decoloración del suelo subyacente

El envés (backing) no tiene en absoluto ningún efecto agresivo para el suelo sobre el que reposa.

### Peeling

En principio, todas las alfombras de hilo perderán fibras. Esto es inherente para cualquier hilatura. Este fenómeno deberá irse reduciendo con el tiempo. El periodo de duración, para que remita el peeling, variará según la hilatura, entre 6 y 24 meses, dependiendo de la intensidad de uso, y la frecuencia de limpieza.

### Envejecimiento

Como cualquier otro material, la alfombra padecerá envejecimiento, con el paso del tiempo. Recomendamos dar la vuelta a la alfombra periódicamente, para conseguir un envejecimiento regular.

### Limpieza con aspiradora

Pasar la aspiradora, de forma regular nos ayudará a eliminar fibras sueltas.

### Uso sobre calefacción del subsuelo

Para los backings de polipropileno y látex, se recomienda, no cubrir más del 70% de la superficie del suelo (backing de alfombras). Para los backings de yute sintético y látex (moqueta), no supone ningún inconveniente, y son conductores, con lo cual no disminuye la efectividad de las calefacciones radiantes. En ambos casos, recomendamos humedecer mediante pulverizador, la moqueta o la alfombra, para mantener las fibras hidratadas.

### Desviaciones en el tamaño

Las alfombras de COTLIN, están hechas a mano. Su forma y tamaño pueden variar ligeramente. Recomendamos no alinear la alfombra, con juntas o vetas rectas del suelo. Esto ayuda a no percibir las posibles irregularidades.

# Maintenance

## Extend the lifetime of your rug

With proper and regular maintenance, your rug can be kept in optimum condition and look impeccable for many years to come. In general, the rugs that require the most care are light-coloured or monochrome rugs, as well as those with lower density, which are thinner; on the other hand, those with greater consistency or with dark and/or patterned shades are easier to care for. In any case, it is advisable to avoid shaking and whipping them when cleaning them, as well as aggressive treatments that can damage their fibres. Cotlin recommends vacuum cleaning (using the specific function for carpets) and following the instructions below.

## General maintenance and preventive measures

### Rug pads

If you place heavy furniture on the rug, we recommend placing rug pads on the legs of the furniture to distribute the pressure of the weight of the furniture on the rug.

### Turn the rug regularly

So that the weights do not always lie on the same points of the rug.

## Specific instructions for use

### Receiving a new rug

On receipt of the new carpet, remove it immediately from its packaging to prevent moisture accumulation.

### Use of underline

Recommended if no heavy objects are to be placed on the carpet to avoid shifting.

### Fading of the underlying soil

The backing has absolutely no aggressive effect on the floor on which it rests.

### Peeling

In theory, all rugs made of fibre yarn will lose threads. This is inherent to any yarn. This phenomenon should reduce over time. The period of time for the peeling to subside will vary depending on the yarn, between 6 and 24 months, depending on the intensity of use and the frequency of cleaning.

### Ageing

Like any other material, rug will age over time. We recommend turning the rug over periodically to achieve a regular ageing process.

### Vacuum cleaning

Regular vacuuming will help to remove loose fibres.

### Use over underfloor heating

For polypropylene and latex backings, it is recommended not to cover more than 70% of the floor surface (carpet backing). For synthetic jute and latex backings (carpet), this is not a problem, and they are conductive, which does not reduce the effectiveness of radiant heaters. In both cases, we recommend spraying the carpet or rug with water to keep the fibres moisturised.

### Size deviations

COTLIN carpets are handmade. Their shape and size may vary slightly. We recommend not to align the carpet with straight floor seams. This will help to avoid any possible irregularities.
