Milos
by Antonio Citterio

The Milos Collection takes inspiration from the archetypal seating of the 1950s and 1960s, traditionally crafted in bamboo and rattan. These forms have been reimagined using advanced technologies and modern industrial manufacturing techniques, resulting in a collection that feels both timeless and contemporary.

At its core, Milos features a distinctive shell made of metal and woven acrylic rope, designed to cradle plush cushions while ensuring both comfort and durability. This shell rests on a structural frame available in either wood or metal, offering a refined and versatile foundation. The design seamlessly allows for the interchangeability of these base materials, adapting to different aesthetic and functional needs.

The collection also includes dining chairs available in two versions—one stackable for greater flexibility and another with armrests for enhanced comfort.

With Milos, the goal was to merge tradition and innovation, seamlessly blending artisanal references with the precision of contemporary industrial craftsmanship to create pieces that integrate effortlessly into modern spaces.

Loden,
by Vico Magistretti

Kettal revives the LODEN collection. Originally designed for Gavina in 1961, Loden is a series featuring an armchair and a sofa with a lacquered wood frame made with four cylinder-section legs and a tilted seat, also made of wood, with curved armrests whose design is similar to the profile of the armrests of the Carimate chairs. The seat and backrest are upholstered in fabric. Dino Gavina, a Bolognese businessman, started producing new furniture in the mid-50s by collaborating with well-known designers and put back into producing furniture by Breuer, a renowned designer in NY, like the Cesca and Wassilly chairs. The Loden series by Magistretti is part of the collections produced by Gavina in the 60S”

Passage,
by Ronan Bouroullec

Passage is a multi-purpose word.

It can be found in many spheres, from travel to literature and music. It suggests movement, fluidity and transition from one place to another. The Passage collection is no less versatile.

Seamlessly moving from one place to another, it can be installed indoors or outdoors, displayed in a public space such as a café terrace, or discreetly placed at home, in an urban or natural setting.

At first sight, the collection seems simple enough. But when we look at the details, we realize the technical sophistication of this chair, the high quality of the welds, the precision of the joints and the finesse of the backrest.

Kari,
by Konstantin Grcic

Designed by Konstantin Grcic, the Kari collection features a pair of highly versatile side tables that can be combined in countless ways. While both tables share a circular top, their bases explore two distinct geometries: cylinders and pyramids.

Currently available in teak wood, their clever construction allows for a wide variety of materials to be used. The geometric shapes lend the pieces an elegant, African-inspired character and a natural aesthetic.

Kari tables serve as practical side tables or occasional seating next to a sofa or armchair. Their lightweight design makes them easy to move around as needed.

Insula tables

Designed as sculptural islands, Ínsula tables by Patricia Urquiola find their identity in the delicate balance between the organic and the refined. Each piece stands as an autonomous object, capable of interacting with its surroundings through its unique presence.

The tabletop, finished in Glaze Agate —a glaze with hypnotic depth and mineral tones— brings a rich, sensory dimension to the piece. Its surface, layered with subtle variations, evokes geological formations and natural processes, as if time itself had crystallized in ceramic.

Soft, fluid lines contrast with the visual density of the glaze, creating a dialogue of textures that invites both touch and contemplation. More than a table, Ínsula is a material experience — a meeting point between contemporary craftsmanship and poetic design.

Anda
by Gonzalo & Miguel Milà

There are moments at the end of the day when you just want to sit outside—on a terrace, somewhere beyond the reach of electrical outlets—and enjoy the absence of overhead lighting in your line of sight.

ANDA is a cylindrical floor lamp with a pared-down, versatile design, conceived to adapt to a wide range of settings. It directs light downward to control dispersion, making it ideal for illuminating an indoor or outdoor lounge area, or a quiet reading corner.

Its medium height and refined design provide comfortable lighting without glare. Portable and dimmable, ANDA allows you to adjust the atmosphere to suit the moment—from a subtle glow to safely move around, to a more focused beam for seated tasks.

High-quality materials and meticulous craftsmanship ensure durability and resistance over time.

Soga Rug
by Vincent Van Duysen

The Soga rugs by Vincent Van Duysen combine natural texture with a simple, balanced design. Made from a rope-like material, they offer a sturdy and comfortable surface suitable for both indoor and outdoor use. Available in four colors — Ivy, New Dawn, Chestnut, and Woodland — the rugs come in two versions: plain or with subtle stripes. Their understated palette and clean lines make them easy to integrate into a variety of spaces.

Pi

PI is an innovative micro-architectural system designed to redefine the work environment. Its flexible structure creates distinct areas within the office, providing spaces where people can isolate themselves from the general surroundings to meet or work without the need for closed doors.

Unlike traditional rigid office planning, PI offers a simple yet multifunctional furniture system, allowing the freedom to design the optimal space for each task. Its configurations are grouped into three main categories: Focus, for concentrated work; Meet, for communication and idea exchange; and a third adaptable option for other functional needs, such as printing stations, kitchen areas, and more.

PI not only helps define spaces but also enhances acoustic comfort by reducing noise and absorbing disruptive sounds from the environment. Its units can be spontaneously used as phone booths, video conferencing rooms, reading corners, quiet coffee spots, or meeting rooms—without the need for enclosed spaces.

Its orthogonal “H” shape design allows for easy spatial structuring. Installation is quick and seamless, without generating noise or altering the building structure. Additionally, the units can be combined, expanded, or adjusted to accommodate changing workspace needs.

PI is made from recycled PET panels, a lightweight yet durable material that not only helps reduce noise but also adds a sophisticated aesthetic and a pleasant textile-like feel. With its versatile design and sustainable approach, PI transforms the concept of office spaces into a more flexible, dynamic, and functional environment.ly helps reduce noise but also adds a sophisticated aesthetic and a pleasant textile-like feel. With its versatile design and sustainable approach, PI transforms the concept of office spaces into a more flexible, dynamic, and functional environment.

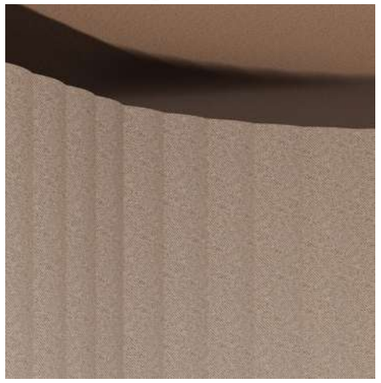
Features

Recycled Materials

Made with sustainability in mind, the PI space divider features PET materials and 95% recycled aluminum—an eco-conscious solution for modern spaces.

Acoustic panel



Designed for sound absorption, the acoustic panels feature wave-shaped surfaces that help reduce noise and enhance comfort in shared spaces.

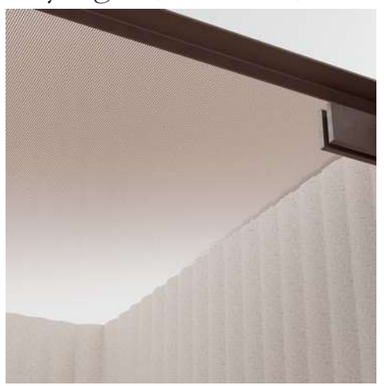
Acoustic ceiling

Inmerse in Peaceful natural day light casacde. Turn the night into a harmonious dance of stars

AirGlow (Phone Booth)

A good air renewal system provides comfort and well-being. A thin layer of air from above refreshes the air in the cabin. A laminar of light from below bathes the wall and work area.

SkyLight (Phone Booth)



Inmerse in Peaceful natural day light casacde. Turn the night into a harmonious dance of stars

FlexTrack

The FlexTrack system offers versatile rail-mounted functionality, allowing you to attach shelves, hooks, magnetic boards, and more—adapting seamlessly to your changing needs

Analog Controller

Analog controls let you adjust lighting with precision, while the PIR sensor adds smart automation by detecting presence

Connectivity

Includes four built-in power outlets for convenient device charging and seamless workspace integration.

Controls (Phone Booth)

Plug USB-A / USB-C / shelf light dimmer, fans power regulator

Integrated wheels

Equipped with discreet wheels and a built-in leveler, PI moves easily and stays firmly in place—flexibility without compromising stability.

Waranty terms

For domestic use, all products, except for cushions, covers and fabrics (including textilines), are guaranteed for a period of five years against any manufacturing defect that affects their suitability for use. This applies to normal conditions of use and maintenance. This guarantee does not apply to faults or imperfections resulting from the passage of time or normal wear and tear. Circumstances not covered by this guarantee include, but are not limited to, the fading or change in shade of colours, changes in wood texture, scratches resulting from use, etc. For non-domestic use, by the hotel and catering industry and collectives for example, all products, except cushions, covers and fabrics, are guaranteed for a period of two years. This guarantee is subject to the same conditions as outlined above.
